Secure Live Environment File Erasure

Blancco File enables secure selective data erasure on active PCs, servers and virtual machines. The solution offers users the ability to easily manage and automate data erasure routines, ensuring full compliance and enhanced security.

BENEFITS

Securely Erase Data in Live Environments

Automate targeted erasure and shredding prevents the leakage of sensitive data. Use internal and external policy-based scheduling by implementing rules and automatic routines to securely erase files and folders. Live environment erasure avoids the need for system downtime during erasure.

Safely Monitor and Report on all Erasure Activity

Validate compliance among national and international regulatory bodies, including PCI DSS and HIPAA and utilize advanced reporting features to ensure a tamper-proof audit trail.

Refine Internal Processes and Improve Transparency

Save time and resources with easy installation onto existing systems with remote installation and deployment. Take advantage of task automation capabilities, which allow automated erasure and increase productivity. Scheduling and integrating erasure routines helps to strengthen knowledge and awareness of internal policies and processes across the business.

TECHNICAL SPECIFICATIONS

AUTOMATION & SCHEDULING:

Schedule erasure of selected files on local or remote servers and work stations

Implement rules and automatic routines to erase files and folders

Enable policy-based scheduling and integration through Windows standard components

Improve user interaction with multiple configuration alternatives available

INSTALLATION & USER MANAGEMENT:

Easy installation on PCs and servers (both physical and virtual machines)

Remote installation and deployment available through MSI package

Central configuration of clients and multiple installations through group policy files

Easy-to-use Windows GUI and advanced command line interface supporting multiple parameters for full flexibility of integration

Can be run from a standalone USB stick when plugged into a computer or server for easy mobility and on demand operations

ERASURE:

Erase all kinds of files such as from programs like Excel, Word and PowerPoint

Overwrite selected files (including previous versions stored by Windows), free disk space, temporary files and the recycle bin

Instantly erase files via drag and drop from the desktop to Blancco File

Erase files and folders on the local computer

Remotely execute secure erasure of files and folders on servers and in storage areas across the network

Certified for use with Windows 7, Vista and XP

Supports all global data erasure standards

REPORTING:

Reports ensure compliance with standards and legislation like PCI DSS requiring deletion of file level data

Centralized, digitally signed and tamper-proof report options

Detailed PDF or CSV reports for easy viewing and XML files for centralized reporting

Full support for the Windows event log

Add custom fields in reports according to process requirements

Detailed reporting includes everything needed for compliance such as security information, user data, file names and exact times

Reports sent automatically to Blancco Management Console as soon as computer is online in the network

SUPPORTED PLATFORMS:

Windows 8, 7, Vista, XP

Windows Server 2012, 2008, and 2003

HP-UX 11.31 with VxFS

AIX 5.1 or later with JFS or JFS2

Solaris under special circumstances

Other operating systems and file systems might be supported. Contact Blancco for more information

32 and 64 bit platforms for all supported OS

LANGUAGE SUPPORT:

English, French, Spanish, German and Japanese. Other languages will be available soon. Please ask your Blancco sales representative for details.

AUDITING:

Full integration with Blancco Management Console for detailed auditing and control to ensure full compliance
